PROFILE SUMMARY

MERN Stack Developer skilled in building responsive and user-focused web applications. Strong foundation in frontend technologies including HTML, CSS, JavaScript, Tailwind CSS, and React.js. Experienced in backend development using Node.js, Express.js, and MongoDB. Passionate about creating clean UI, improving performance, and solving real-world problems through hands-on projects.

PROJECTS

Weather App – React + API Integration   **November - 2025**

Self–Based

Tech Stack - React.js, Vite, Tailwind CSS, JavaScript (ES6+), Axios, REST API, Git, GitHub, VS Code

- Built a real-time weather application using OpenWeather API to display live weather data.
- Added features such as city search, temperature, humidity, wind speed, and condition icons.
- Implemented error handling and loading states for a smoother user experience.
- Designed fully responsive UI using Tailwind CSS.

Nostra E-Commerce Website Frontend project   **October - 2025**

Self–Based

Tech Stack - HTML, CSS, JavaScript (ES6+), Git, GitHub, VS Code

- Built a three-page responsive website with clean UI and semantic HTML structure.
- Added interactive UI elements using vanilla JavaScript to enhance engagement.
- Used Git and GitHub for commit history and organized development workflow.

EDUCATION

BSC(MCS) Degree, CGPA - 7.14, Al-Ameen Degree College, (2022 to 2025)

CERTIFICATION

Error Makes Clever   **January-2026**

- Full Stack Web Development
